Pilot PT

Pilot Phraseology Trainer

Learn to speak like a pilot
anytime, anywhere.

Student pilots interact with simulated ATC, flying gate to gate with a variety of worldwide flight plans. This stand-alone training tool eliminates instructor role-playing while teaching new pilots vital communication skills in a realistic aviation context.

INCREASE PILOT COMMUNICATION SKILLS

Built on ASTi's cutting-edge speech and language processing technology, the Pilot PT:

- Scores students based on adherence to official communication standards
- Evaluates ICAO Level 4 proficiency measures, including pronunciation, structure and comprehension of ATC communications
- Varies air traffic controller accents by region
- Develops students' understanding of radio protocols and press-to-talk operation

WEB-BASED TRAINING

The Pilot PT is an affordable, online solution that decreases the time spent on expensive training devices:

- Train anywhere, anytime
- Fly anytime with instructor review later
- Receive comprehensive feedback with each voice interaction
- Add new flight plans to focus on specific scenarios or skills
- Practice as much as needed to develop your skills

SUPERIOR ACCENT SUPPORT

ASTi's highly customized ATC speech recognition supports over 30 specific English accents, recognizing a variety of students while providing accented speech for simulated controllers. Performance feedback helps English as a second language and native English speakers alike learn proper phraseology and pronunciations.
